

### Data Utilization Professional Development

Following requests to redeliver professional development focusing on data utilization that was conducted during the January principal meeting, the central office academic staff has refined this session for redelivery to the audience of **master teachers and special education chairpersons**. New to this session is a presentation by Germaine Edinburgh linking school specific data to school performance projections. Other additions include specific high school and elementary school examples of the link between school-based progress monitoring data and the data analysis flow chart.

Logistical information regarding this training session has been included on recent editions of the PD calendar (attached) and on the table located below. Participation in this session is open to master teachers, special education chairpersons and any other instructional administrator that might benefit from the content of this session. **Please see the table below for session time by school. Space is limited so please confirm session attendance by forwarding the name of the staff member(s) planning to attend via email to Tammy Robicheaux.**

Session	School Group	Location
